ABOUT THE PROJECT

TBL 4 Tourism addresses a global issue - educators, workers and employers are being made aware of the need for a more flexible and adaptable workforce to meet the demands of the modern workplace. One of the approaches is a different way to teach and learn languages, focusing on English as it remains the leading language of international discourse in the 21st century.

LANGUAGE LEARNING

The project is innovative, as the field of task-based learning is an approach that is relatively new in terms of practice as well as in its impact on education and training. This project aims to address the issues concerning the language and soft skills proficiencies of those active in the tourism sector by upskilling VET and English language educators in the use of TBL, an innovative language learning methodology.

PROJECT TEAM

The project consortium is composed of five organizations from five different EU countries (Slovenia, the United Kingdom, Spain, Romania and Serbia), and includes cooperation between new, old and non-EU Member states.

TARGET GROUPS

The project idea puts young adult learners employed in tourism sector industry in focus.

The project will focus on providing vocational school teachers all over Europe with the knowledge and tools that are necessary to effectively implement a task-based syllabus within their own teaching contexts
